

3D Pattern Making Course

This course is to learn how to use various tools necessary to create patterns for 3D. Pattern fitting operations are also introduced in the course. To take the course, you need to have an APEXFiz® Design-Standard/Weave/Knit/Pro subscription plus 3D Option. SDS®-ONE APEX4 users can also take the course.

Note: In principle, we recommend that those who have knowledge of patternmaking take this course.

◆◆ What you can learn in the course ◆◆

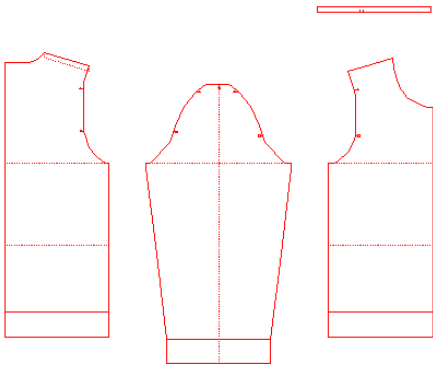

Basic Operations:
Basic operations for using the software

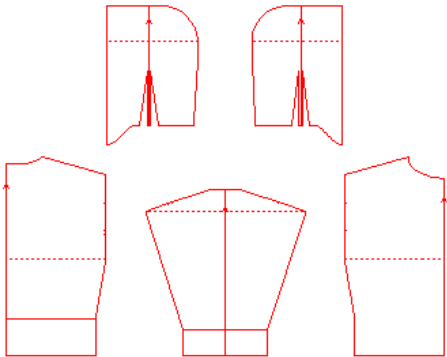

Avatar Creation:
Creation of original avatars for 3D fitting

Pattern Making:
Basic pattern creation with manual operation and automatic function
